I understand that changing the divisor multiplies the result by that, but why doesn't changing the numerator cancel that out? I found out somewhere else since posting, is there a way to ...

For example, the sum of all numbers less than 1000 is about 500,000. So, 168,000 \times 500,000 or 84,000 \times 84,000 should be in the right ballpark. 76127 ...

1000 is the number of small cubes in the original cube. Each face of the original cube contains $10 \times 10 = 100$ small cubes, so the effect of removing the ...

1 If a number ends with n zeros then it is divisible by 10^n , that is $2^n 5^n$. A factorial clearly has more 2s than 5s in its factorization so you only need to count ...

A hypothetical example: You have a $1/1000$ chance of being hit by a bus when crossing the street. However, if you perform the action of crossing the street 1000 times, then your chance of being ...

Number of ways to invest \$20,000 in units of \$1000 if not all the money need be spent Ask Question Asked 2 years, 11 months ago Modified 2 years, 11 ...
