Do solar projects need an EPC contract?

In our experience, most utility-scale solar projects use an EPC Contract. An operation and maintenance agreement: This is usually a medium- to long-term Operating and Maintenance Agreement (O&M Agreement) with an Operator. The term of the O&M Agreement will vary from project to project.

Why did EPA develop a solar RFP document checklist?

EPA developed a solar RFP document checklist to keep track of key components, such as scope and deliverables, specific requirements, and RFP submission process and key dates.

Do EPC contracts eliminate or mitigate risks?

EPC Contracts do not eliminate or mitigate against all risks; however, when drafted correctly they can ensure performance, timely delivery and rectification within agreed parameters or up to agreed caps. For this reason, we recommend advice on a project-by-project, contract-by-contract basis.

The Procurement and Contracting Division (PCD) was established to serve as an internal consulting and advisory group within the Department of Health Care Services (DHCS) ...

Receive current federal contract opportunities for finding active Bids, RFPs, RFQs and pre-RFPs from the federal government agencies. Register to be notified of newly posted federal business ...

The buyer enters into a long-term contract to purchase renewable energy from one or more sources, and the power is delivered through the existing grid. As these offsite installations are often much ...

the system or choose to buy the solar energy system from the developer.

For this reason, we recommend advice on a project-by-project, contract-by-contract basis. Before examining EPC Contracts in detail, it is useful to explore the basic features of a solar project.
