What makes SEL a good microgrid control system?

SEL is the global leader in microgrid control systems, verified by rigorous independent evaluations and proven by 15+ years of performance in the field. Our powerMAX Power Management and Control System maximizes uptime and ensures stability, keeping the microgrid operational even under extreme conditions.

Who makes the best microgrid control systems?

SEL is the top vendor of microgrid control systems in the Guidehouse Insights 2021 microgrid controls leaderboard report, which evaluates the strengths of the world's 16 leading microgrid control system providers.

Is SEL PowerMax a top-performing microgrid control system?

Navigant Research (now Guidehouse Insights) also recognized SEL as the industry leader in its 2018 leaderboard report. In 2017, SEL powerMAX was recognized as the top-performing control system at a microgrid symposium hosted by the Massachusetts Clean Energy Center and the MIT Lincoln Laboratory.

What is a microgrid control system?

The microgrid control system also generates historical data that can be used for cost impact estimation and load and generation forecasting. This allows you to implement energy storage and peak-shaving strategies to reduce energy cost and use renewable sources when they're most advantageous.

Scalable runtime options with matching external battery cabinets provide additional flexibility when a longer uninterruptible power supply is required. The user-friendly LCD display and network ...

We supply and distribute a comprehensive range of passive and active equipment and tooling for network deployment, upgrades, and maintenance, supporting all technologies including FTTH, FTTx, ...

The ready-made solutions offer a cost-effective and convenient way to increase automation in the distribution network to improve the availability and reliability of ...

Integrates solar input, battery storage, and AC output in a compact single cabinet. Offers continuous power supply to communication base stations--even during outages. Remote diagnosis, ...

Provide stable power supply for villages and pastures without electricity, support centralized energy storage of household photovoltaic systems, and solve the power consumption problems of lighting, ...

The ready-made solutions offer a cost-effective and convenient way to increase automation in the distribution network to improve the availability and reliability of power supply.

Whatever the application choice, SCHAEFER GmbH Germany designs, manufactures & produces the power supplies used in these applications.

Scalable runtime options with matching external battery cabinets provide additional flexibility when a longer uninterruptible power supply is required. The user ...
