---

20-120kWh modular battery storage system for commercial, solar, and backup applications. Scalable, high-voltage solution with LiFePO4 safety and BMS.

Compatible with IEEE 1547 and various UL certifications, our solutions can be scaled to meet various applications including utility scale power, data centers, renewable energy (such as solar and wind), ...

Off grid standby power supply: when the power supply of the power grid is interrupted, provide uninterrupted short-term power supply for important loads to reduce the economic losses caused by ...

Battery Energy Storage Systems (BESS) are emerging as a critical component of modern data center infrastructure. By providing service to your operation's power grid, as well as secondary backup ...

Off grid standby power supply: when the power supply of the power grid is interrupted, provide uninterrupted short-term power supply for important loads to ...

Even a few minutes of downtime can mean big complications and millions in lost profits for your data center. We'll work with you to design and implement a scalable data center backup energy solution ...

This integrated lithium - ion battery system cabinet combines a 100KW power output module with a 233KWh high - capacity energy storage unit, designed for reliable energy supply in industrial, ...

Ideal for deployment in industrial parks, supermarkets, hotels, office buildings, data centers, and solar charging stations, this high-efficiency energy storage solution enables users to reduce electricity ...
