What is a battery energy storage solution?

A battery energy storage solution offers new application flexibilityand unlocks new business value across the energy value chain,from conventional power generation,transmission &distribution,and renewable power,to industrial and commercial sectors.

Why do we operate a 1MW / 1 MWh energy storage system?

We operate our own 1 MW /1 MWh energy storage system in Finland to test and validate new technology in real conditions. In addition to hardware,we offer complete services from project development and EPC delivery to operations and maintenance.

Where are battery energy storage systems made?

We design and manufacture our battery energy storage systems in Finland,including the Power Conversion System (PCS),bi-directional inverters,system-level controls,and the Energy Management System (EMS). Only the batteries are sourced externally. This gives us full control over quality,integration and reliability. 2.

How many MWh of energy storage does GE have?

To date GE has more than 207 MWhof energy storage in operation or in construction globally. This project will relieve pressure on the host country's energy system and provide flexibility when it is most needed to deliver a more balanced,secure energy system and help reduce consumer energy cost.

These units have power ratings ranging from 5 kW to 120 kW. Since Omnes Energy"s devices are modular in nature, any combination of energy storage and power is easily provided to ...
