Built with LiFePO4 battery cells, it offers long life, safe operation, and steady performance. You can use this system in homes, commercial buildings, EV charging stations, and microgrids.

The 120 kW automatic switching cabinet integrates STS-based control, protection, and monitoring functions to enable safe and automatic grid-connected and off-grid operation works with energy ...

The 120kWh battery works in grid-tied, grid-backup, and off-grid modes with over 90% efficiency. If your project needs more power, you can add up to 6 modules or connect multiple cabinets in parallel.

With PVMARS solar IoT, through your phone or computer view real-time performance data of your solar system, such as solar panel power generation, battery capacity, etc., and receive timely maintenance ...

Powerful 50KW/120KWh hybrid energy storage solution with integrated inverter, BMS & EMS. LFP batteries, redundancy design. Expandable up to 120KWh.

With extensive experience and innovative technology, this home battery delivers reliable backup power during emergencies. It features a modern design, high ...

The 120kWh battery works in grid-tied, grid-backup, and off-grid modes with over 90% efficiency. If your project needs more power, you can add up to 6 modules or connect multiple cabinets in ...

Whether supporting peak shaving, demand response, or renewable integration, the 120kWh Micro-grid Air-cooled ESS is your trusted solution for next-generation energy storage systems in the C& I sector.
