Does industrial green innovation efficiency converge in the Yangtze River economic belt?

ESDA analyzes the spatial differentiation characteristics of industrial green innovation efficiency in the Yangtze River Economic Belt. Then, the traditional convergence model is enriched based on spatial and conditional effects, and the convergence of innovation efficiency is further explored.

How can the Yangtze River Delta benefit from a strong industrial base?

For the high-value Yangtze River Delta area, leveraging its strong industrial foundation and innovative resources is critical. This involves developing key sectors, such as integrated circuits and emerging fields like artificial intelligence and quantum computing, through pilot research areas and industrial hubs.

Where is the Yangtze River economic belt located?

The Yangtze River Economic Belt (YREB) is an important east-west economic corridor in China, covering 11 provinces and municipalities, including Shanghai, Jiangsu, Zhejiang, Anhui, Jiangxi, Hubei, Hunan, Chongqing, Sichuan, Yunnan, and Guizhou. The specific geographical location of the YREB is shown in Figure 1.

Why are cities in the Yangtze River economic belt promoting green technology innovation?

The main reason is that based on China's regional integration construction, cities in the Yangtze River Economic Belt have strengthened regional exchanges and cooperation, resulting in a trend of convergence in the efficiency of green technology innovation among different cities.

Based on 94 listed equipment manufacturing companies' green technology innovation data in the Yangtze River Economic Belt (YREB) from 2018 to 2021, this paper explores the GTIE ...

This appendix documents work completed on project benefits for the Yangtze River Economic Belt Jiangxi Ecological Civilization and Circular Economy Project. The work was undertaken to provide a ...

Empirical analysis shows that the industrial structure upgrading and environmental regulation have a significant impact on GTFP and show regional characteristics. The more developed the economy ...

The Yangtze River Delta region is a powerhouse of economic and innovative activities in China. With its advanced manufacturing, a dense network of thriving industries, and a strong ...

Based on the Haken Model, this paper summarizes the coevolution law of logistics industry and

120kWh Server Rack Manufacturing in the Yangtze River Economic Belt

manufacturing industry in the Yangtze River economic belt through two-stage empirical analysis, and ...

Explores the spatiotemporal evolution of trade-offs and synergies between urbanization and carbon balance in the Yangtze River Economic Belt. Reveals regional disparities and interaction ...

Using the entropy weight method, we measure manufacturing ICSC resilience across provinces and cities in the Yangtze River Economic Belt from 2017 to 2022 and further ...

With the increasingly serious problems of global climate change and resource tension, green manufacturing has become an important direction of industrial development.
