How can a pm solicit a Solar System proposal?

To solicit proposals for a solar system, a PM can issue a competitive RFP publicly and to multiple certified installers, or request quotes directly from a few trusted installers. For either of these methods, the PM can use MassCEC's project and cost data to find installers who have completed nearby commercial projects.

How does the Federal Government procure a solar system?

The federal government procures construction services and materials for solar systems through multiple agencies. All procurement notices for federal contracts over \$25,000 are posted on the System for Award Management (SAM) website. For example, a 5-MW solar system at Fort Campbell in Kentucky was installed in 2017 and accounts for 10% of the base's energy needs.

Can a solar contractor work with the government?

Solar contractors can pursue federal government work through subcontracting opportunities. Most government construction contracts, including subcontracts, reflect policies contained in statutes and in the Federal Acquisition Regulation (FAR).

How does a solar power contract work?

The contractor shall generate safe and reliable renewable energy from solar photovoltaic (PV) systems sited on federal government property over the contract life. The electricity shall feed into government electrical distribution systems on the "customer side" of utility meter.

Bid on readily available Solar contracts with the best and most comprehensive government procurement platform, since 2002. Bidding for Solar RFPs is extremely lucrative ...
