In a world first, the UAE has launched a giga-scale project that combines solar power with massive battery storage to provide round-the-clock renewable energy. That's right - clean, green ...

With solar, storage, and smart controls, clean energy can be as dependable as coal or gas--without the emissions. If it works, this project won't ...

In a remarkable advancement for renewable energy, the United Arab Emirates, under the auspices of His Highness Sheikh Mohamed bin Zayed Al Nahyan, President of the UAE, has ...

The UAE has launched what it says is the world's first and largest 24-hour power project, combining solar photovoltaic with battery storage to deliver 1 gigawatt of baseload electricity.

The Emirati state-owned renewables developer Masdar has begun construction on a giant solar-plus-storage project in Abu Dhabi.

The United Arab Emirates is building the world's largest solar and battery storage project that will dispatch clean energy 24/7.

The project, led by Masdar and Emirates Water and Electricity Company (EWEC), will combine solar power with advanced battery technology to deliver clean energy around the clock.

With solar, storage, and smart controls, clean energy can be as dependable as coal or gas--without the emissions. If it works, this project won't just light Abu Dhabi's night.
