Whether you want to expand your energy storage or are looking for a complete system around generation, consumption and buffering: we deliver a solution that ...

Flexible and Convenient: Modular PCS allows for linear expansion of battery units and bidirectional energy storage inverter units; it possesses independent charging and discharging control capabilities ...

Our large-scale storage systems provide high-performance lithium-ion energy solutions that offer a solid foundation for load balancing, atypical and intensive grid use, and other applications.

Stores up to 500 kWh of electricity, suitable for various high-demand applications. Equipped with a 3#215;120 kW inverter (400A), enabling efficient charging of construction machinery and electric vehicles.

Modulair AC/DC-ontwerp voor flexibele configuraties en eenvoudige uitbreiding. Ondersteunt 0,5C/0,25C/0,125C opslagoplossingen voor diverse toepassingen. Clustermanagement vermindert ...

kW/1000 kWh energy storage system. Approach 1: Parallel Operation of Mu Hz, three phase low voltage power. The initial energy capacity is 500 kWh. The system also adopts LiFePO4 battery technology ...

Stores up to 500 kWh of electricity, suitable for various high-demand applications. Equipped with a 3#215;120 kW inverter (400A), enabling efficient charging of ...

The equipment can automatically charge the storage batteries using valley-time urban electricity with a low cost and can be set to the long-time status of interruptible power supply.
