What services are included in a solar PV contract?

The services included by the contractor shall include operation and maintenance of all components of solar PV systems for the life of the contract, as detailed herein.

How can a pm solicit a Solar System proposal?

To solicit proposals for a solar system, a PM can issue a competitive RFP publicly and to multiple certified installers, or request quotes directly from a few trusted installers. For either of these methods, the PM can use MassCEC's project and cost data to find installers who have completed nearby commercial projects.

Who determines the final content of a solar PV solicitation?

Agency contract officers, attorneys, and engineers are responsible for determining the final content of any solicitation. Updated to the regulations, codes, and standards applicable to solar PV are changing frequently; it is the responsibility of agency managers to determine which guidelines (and which versions) apply. Figure 1.

What does a contractor have to do with a kilowatt-hour system?

contractor has to do with the trade-off between the lowest cost (\$/kilowatt-hour [kWh]) systems and the higher-producing (annual kWh) but costlier systems, and the many ancillary benefits that might be incorporated into a proposal.

Decide whether to include solar + storage projects in a procurement based on storage benefits for addressing energy cost savings and/or resilience use cases at specific sites.

The enclosed technical template language is intended to provide only example language for agencies to consider in the process of assembling a solicitation and ultimately a contract for privately financed on ...
