---

This energy storage system features a 500kW bi-directional power conversion system (PCS) paired with a 645kWh lithium iron phosphate (LFP) battery bank. Designed specifically for ...

Integrated Substations: Pre-installed box-type substations featuring compact structure, quick installation, energy-saving, and environmental protection, suitable for urban power grids, temporary power use, ...

It is a large multi-function smart energy storage station. Comprehensive and multi-level battery protection strategies and troubleshooting measures are in place. ...

It adopts door-mounted embedded integrated air conditioning, which does not occupy cabinet space, improves the available space of outdoor cabinets, has better structural integrity at the ...

500kW power output with modular design, supporting expansion up to 1.5MWh (customizable based on your product specs). Seamless integration with existing ...

The equipment can automatically charge the storage batteries using valley-time urban electricity with a low cost and can be set to the long-time status of ...

500kW power output with modular design, supporting expansion up to 1.5MWh (customizable based on your product specs). Seamless integration with existing inverters for hybrid energy systems.

? High-Capacity Outdoor Energy Storage for Scalable Applications Key Features: 1075kWh battery storage with 500 kW rated AC output, ideal for commercial and industrial loads. Combines LFP ...
