Chinese PV module manufacturer Trina Solar has received the green light from the Victoria government in Australia to build a ...

The proposed Hunter Valley facility, to be built at Black Hill near Maitland, will draw on Sunman's established technology and track record as a ...

The Victorian government in Australia has expedited approvals for 2 major renewable energy projects - a 500 MW solar farm integrated with a 300 ...

The project will involve the construction of a 500MW-scale testing platform and a 1.5GW photovoltaic development pipeline, aimed at reducing the levelized cost of electricity through ...

The proposed Hunter Valley facility, to be built at Black Hill near Maitland, will draw on Sunman's established technology and track record as a lightweight solar innovator to manufacture ...

The Australian Renewable Energy Agency (ARENA) has announced up to AU\$151 million (US\$98 million) in conditional funding for Sunman Energy to establish a 500MW solar module ...

The Victorian government in Australia has expedited approvals for 2 major renewable energy projects - a 500 MW solar farm integrated with a 300 MW battery energy storage system ...

Sunman Group, a specialist in lightweight solar technologies, has announced the construction of a solar photovoltaic module manufacturing plant with an annual capacity of 500 MW in the Hunter Valley, ...
