Rising Rack Densities: A Driver for High-Density Rack Power Distribution Units The average power density of data center racks continues to rise to support AI and ML, crossing 10kW in ...

Managing the cooling and power requirements of a 50kW rack density AI data center presents a unique set of challenges. In this blog post, we will explore effective ...

Malaysia dominates Southeast Asia's upcoming data center market with almost 50% of the total power capacity. Almost 80% of the existing Rack capacity is concentrated around Singapore,...

Managing the cooling and power requirements of a 50kW rack density AI data center presents a unique set of challenges. In this blog post, we ...

Consider that many data center racks are designed with less than 20 kW of power - with many more having less than 10 kW. GenAI systems require much more power :- a fully configured ...

Consider that many data center racks are designed with less than 20 kW of power - with many more having less than 10 kW. GenAI systems require much more power :- a fully ...

This database (excel) product covers the SEA data center market portfolio analysis, which will provide the following information on the colocation data centers:

GPU racks hit 50kW thermal limits. Liquid cooling delivers 21% energy savings, 40% cost reduction. Essential guide for AI infrastructure teams facing the wall. The exponential ...
