Will Indonesia use battery storage in its power plants?

Indonesia's current pipeline of energy storage projects is mostly pumped hydro, totalling 4,063MW according to IHS Markit. Indonesia has launched a 5MW battery storage pilot project and says it could use the technology at all its state-owned power plants.

Will PLN build a 5 MW battery energy storage system?

The Indonesian state-owned utility PLN has signed a memorandum of understanding (MOU) with the Indonesia Battery Corporation (IBC) to build a 5 MW battery energy storage system (BESS) pilot project this year, as the country shifts from diesel-generated power to renewable energy.

Will PLN build a battery in Indonesia?

The country's state-owned utility PLN has signed a memorandum of understanding with another state-owned body, the Indonesia Battery Corporation (IBC), to build the BESS this year, PLN said.

Why is there a growing demand for battery storage in Indonesia?

There is a growing demand for battery storage in Indonesia as the development of renewable energy plants, especially solar power plants and wind power plants, requires batteries to provide a stable and consistent electricity supply.
