When will 5G start in Brussels?

Belgium's capital Brussels is finally on course to launch 5G services, with the service set to go live as early as this September. Local media reports have confirmed the main legislative work has been completed to ensure antennas will finally be upgraded or replaced to distribute 5G throughout the Brussels region from September.

Where is the 5G network in Belgium?

Network Research Belgium (in the 3600 MHz band) (NRB's 5G user rights were transferred to Proximus in 2024). The 5G network coverage can be viewed [here](#). Overall, the 5G network appears to be better developed in the northern area of Belgium, in particular in Antwerp, Ghent and coastal cities, as well as in the periphery of Brussels.

Will 5G antennas be allowed in Brussels?

According to De Tijd (subscription) and the Brussels Times, the executive order allowing for the deployment of 5G antennas has now been published in the official journal, following parliamentary approval for the relaxation earlier this year.

What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.

The government of the Brussels Capital Region has approved an increase in local radio frequency emissions, enabling 5G services

A) 5G will still require hardware changes. It will act as an interim, but it will still not satisfy the need for true 5G network architecture. The number of base stations needed increases with each ...
