Approved under EU state aid rules, the Italian scheme will support the construction of electricity storage facilities with a joint capacity of more than 9GW/71GWh and will run until 31 December 2033.

Italy's sun-drenched vineyards and coastal winds could power entire cities--if we could store that energy effectively. Enter energy storage stations and virtual power plants (VPPs), the ...

This article explores how modern electric energy storage systems are revolutionizing steel production by stabilizing power demand, reducing operational costs, and supporting sustainable practices.

Exide Technologies has signed a new contract with an Italian foundry, specializing in structural castings for the machine and energy sectors, to deliver its Solition Mega Three, a ...

The European Commission has approved a EUR17.7 billion (\$19.5 billion) Italian scheme to support the construction and operation of a centralised electricity storage system to integrate ...
