Who makes outdoor Telecom cabinets?

Since 1989, we've manufactured outdoor telecom cabinets in America's Heartland, providing telecommunications companies, utilities, and network operators with BABA-compliant solutions that protect critical equipment from the harshest environmental conditions.

What is an outdoor telecom enclosure?

Our outdoor telecom enclosures support a wide range of telecommunications and infrastructure needs: Fiber Optic Networks: From compact fiber distribution units to high-capacity data center enclosures like the AP-Data with six slack frames, our cabinets manage dark-fiber volumes with organized cable management and secure slack storage.

Where are outdoor Telecom enclosures made?

Every outdoor telecom enclosure we manufacture is designed, fabricated, and assembled entirely in the USA. Our commitment to American manufacturing means you receive consistent quality, faster lead times, and complete Build America, Buy America (BABA) self-certification documentation with every order.

What are NEMA rated cabinets?

Our NEMA-rated cabinets are built to withstand whatever nature delivers. Each weatherproof outdoor enclosure is rated NEMA Type 3, 4, 5, or 6 and undergoes rigorous field testing to ensure reliability in demanding outdoor environments.

Learn how advanced outdoor telecom cabinets enable future-proof networks by supporting evolving technologies, modular upgrades, and scalable infrastructure deployment.

Whether it's for 5G networks, fiber optics, or traditional telecom systems, the need for durable, high-performance outdoor telecom cabinets is undeniable. At AZE, we pride ourselves on delivering ...

Explore how energy-efficient outdoor telecom cabinets reduce power consumption, enhance sustainability, and lower operational costs for modern telecom networks.

Equipped with a high-efficiency AC unit, the cabinet maintains stable internal temperatures to prolong equipment lifespan. Rated IP55/IP65 for dust, water, and corrosion resistance, it's ideal for telecom ...

AZE's outdoor enclosures are designed to provide secure, reliable, and efficient housing for critical

telecommunications equipment in even the most demanding environments

Each cabinet undergoes pre-installation, configuration, and joint testing before delivery. It features reliable electromagnetic shielding, thermal insulation, anti-theft design, and an IP55-level ...

Telecom Rectifier System efficiency and high PF in outdoor cabinets cut energy costs, reduce heat, and ensure reliable DC power for network stability.

Whether you need a compact fiber distribution unit or a large UPS enclosure, each outdoor telecom box can be configured to support integrated power, fiber optic, ...
