Located in the Pyrenees region, this project addresses critical challenges like grid balancing and intermittent power supply from solar and wind farms. But what makes it a game-changer? Let's dive in.

The Andorra-China Sodium Energy Storage Project Bidding marks a pivotal shift toward sustainable, accessible energy storage solutions. By combining China's manufacturing prowess with Andorra's ...

As we approach Q4 2025, China's pushing beyond traditional lithium-ion. Their new solid-state batteries promise 50% more density at half the weight - crucial for historic cities like Andorra where space ...

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems.

The Andorra-China Sodium Energy Storage Project Bidding marks a pivotal shift toward sustainable, accessible energy storage solutions. By combining China's manufacturing prowess with Andorra's ...

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.

With 90% of its electricity historically imported, the country's push for energy independence has turned energy storage project construction into a strategic priority. This article explores how cutting-edge ...

Nestled in the Pyrenees mountains, Andorra faces unique energy challenges that demand custom energy storage equipment. With 80% of its electricity imported and ambitious climate neutrality ...
