How did Trump's 2025 tariffs affect the Middle East?

Trump's 2025 tariffs triggered global economic and energy disruptions, indirectly impacting the Middle East. While Gulf states avoided major direct hits, risks to energy exports, macroeconomic uncertainty and global trade shifts present challenges, but also open market and policy opportunities.

Are tariffs a threat to the Middle Eastern energy sector?

The tariffs present Middle Eastern states with some opportunities, but pose major risks, especially to the energy sector. Analysing the tariffs is challenging. First, they follow on earlier measures, dating back to Trump's initial term in office, some retained by President Joe Biden.

Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

Will US tariffs affect energy storage?

There have also been indications that the US administration may consider other tariff proposals impacting energy storage, such as a 10-20% universal tariff, tariffs of up to 60% across the board on Chinese-origin goods, and tariffs of 25% on Mexican and Canadian origin goods.

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

This article explores the key GCC requirements for energy storage exports, providing guidance on certifications, technical standards, and market expectations.
