From Southeast Asia to India and Australia, landmark policies, first-of-their-kind projects and bold investment decisions show that energy storage is no longer a niche ...

Let's face it--North Asia's energy landscape is at a crossroads. With China's renewables capacity hitting 1,200 GW last quarter and Japan accelerating nuclear reactor restarts, you'd think we've got this ...

Southeast Asia can look to Australia and Japan as examples of how to promote the adoption of energy storage systems (and, once the necessary regulations are in place, the potential speed ...

From Southeast Asia to India and Australia, landmark policies, first-of-their-kind projects and bold investment decisions show that energy storage is ...

NEW YORK -- China dominated global battery energy storage system installations last year, with a record 174.19 gigawatt-hours of new capacity, more than triple the figure for ...

The solution is energy storage, and unsurprisingly, countries across Asia are urgently investing in various technologies, including battery energy ...

China continued its high-growth energy storage market expansion in July 2025, with 1,556 new energy storage-related projects filed for registration, ...

As we barrel toward 2025, North Asia's energy storage landscape is evolving faster than a viral TikTok dance. Whether it's China's 800kV ultra-high voltage storage ...
