What is Australia's biggest energy tender?

Australia's biggest tender delivers 15 GWh of battery energy storage systems, boosting grid reliability and advancing the 2030 renewable target.

What is the largest battery energy storage tender?

The third CIS tender awarded 4.13 GW of contracts to battery energy storage projects across the mainland NEM. This marks the largest battery tender to date. The tender locked in 15.37 GWh of energy storage capacity. This tops the previous record of 13.8 GWh set by the LTESA long-duration energy storage tenders.

How many battery energy storage projects are in Australia?

Sixteen battery energy storage projects with a combined capacity of 4.13 GW / 15.37 GWh have been named as the winners of the Australian government's latest Capacity Investment Scheme tender.

Who are Australia's leading energy storage companies?

Global players such as TotalEnergies, Lightsource bp, and AMPYR Australia also secured awards, underscoring the international confidence in Australia's energy storage market. Geographically, New South Wales and Victoria each host five projects, Queensland four, and South Australia two.
