What are energy storage cabinets?

Designed to seamlessly integrate with your existing power infrastructure, these cabinets offer efficient energy storage in a compact, robust form factor. They are ideal for facilities requiring a clean and organised power management system while maintaining high energy capacity and reliability.

What is a 500 kw/250 kWh battery?

Save costs, cut emissions, and enjoy a fully integrated plug-and-play design. A 500 kW/250 kWh battery solution offers greener on/off-grid power. Save costs, cut emissions, and enjoy a fully integrated plug-and-play design. A 500 kW/250 kWh battery solution offers greener on/off-grid power.

Why should you choose a battery cabinet?

These units provide dependable energy storage, ideal for environments where floor space is limited but power requirements are high. Suitable for a broad array of applications, from commercial operations to critical network systems, our Battery Cabinets ensure continuous power supply and effective space management.

How many batteries can be installed in one enclosure?

Capacity from 3 to 12 batteries, and with the ability to parallel multiple cabinets, there really is a solution for all applications. Installing the batteries. All in one enclosure for inverter and batteries.

Our pre-wired cabinets minimise the time required to install batteries and inverter equipment on-site. Ranging from small battery enclosures to cabinets, including gear trays you can pre-build and test in ...
