What is the share of renewables in Austria's energy consumption?

However, the share of renewables in Austria's gross final energy consumption accounts for only approx. 36.5%. Owing to political efforts and the promotion of renewable energy, there are several other renewables that have gained importance over the past few years including wind, geothermal and solar energy.

Will Austria achieve 100 % renewable electricity in 2022?

Austria produces 8.2 TWh from wind energy, which accounts for 11.1% of the country's electricity consumption. The Austrian scheme to support the production of renewable energy (EAG), approved by the European Commission in 2022, should provide the framework for reaching Austria's goal of 100 % renewable electricity in 2030.

How much wind energy does Austria produce in 2021?

To read more about Austria's wind energy sector in 2021, read their chapter in the 2022 Annual Report. Total wind power capacity is 3,560 MW. Wind power capacity in Austria increased by 315 MW in 2022. Austria produces 8.2 TWh from wind energy, which accounts for 11.1% of the country's electricity consumption.

What is the role of renewables in Austria?

Compared internationally, Austria holds a pioneering role in this segment, as almost 85% of the domestic primary energy production is based on renewable energy sources ("renewables"). Due to its topography, Austria provides two of the most important renewables to a considerable extent (i.e., hydropower and biomass).

The expansion of hydropower, wind, and solar capacity will play a crucial role in sustainably meeting rising electricity demand. Upcoming legislative measures ...

This article unpacks renewable energy laws in Austria, discussing competition and antitrust, storage, foreign investment and international obligations, and more.

Long awaited in Austria, the draft bill on the EABG has finally been presented. We summarise the most important points.

Owing to political efforts and the promotion of renewable energy, there are several other renewables that have gained importance over the past few years including wind, geothermal and solar energy.
