-----

Monitor and control BESS and photovoltaic installations across the island in real time. House a research and development center to provide ...

In 2018, The Barbados Light & Power Company Ltd @BLPC installed utility-scale energy storage as a component of the 10 MW Solar Photovoltaic (PV) plant in the north of the island at ...

With the current grid unable to absorb more intermittent solar energy, battery storage is the key to unlocking a backlog of projects and enabling 24/7 renewable power.

The tender process will open the door for developers to bid for up to 60 megawatts of battery storage. Projects must be at least 1 MW in size, and each bidder can be awarded up ...

The 4.6MWh Hybrid BESS project is set to play a pivotal role in achieving this ambitious target. As the development of local renewable energy accelerates, energy storage technology will ...

Successful bidders will get a Storage Licence granted by the MEB and enter into a long-term ESAG with the Barbados Light and Power Company, the private-owned national utility.

A cost recovery application for 90MW of battery storage, filed by Barbados Light & Power Company (BLPC), has been only partially approved by the eastern Caribbean island nation's regulator.

Barbados is a step closer to launching its first procurement project for Battery Energy Storage Systems to support the grid and unlock stalled Solar PV connections.
