How do I create a custom battery management system?

Our process for creating custom battery management systems begins by developing BMS modules and custom BMS boards that manage your project's voltage, current, temperature, and data communication with total accuracy.

What is a battery management system (BMS)?

Voltaplex is proud to design and manufacture battery management systems (BMS) that optimize lithium-ion battery packs' safety, reliability, and performance. We engineer our solutions for seamless integration across various industries, including robotics, automotive, and medical devices.

How do I design a custom BMS for Li-ion batteries?

Designing a custom BMS for Li-ion batteries requires careful consideration of safety, performance, cost, and regulatory requirements. Success depends on thorough understanding of battery chemistry, robust circuit design, comprehensive testing, and adherence to industry best practices.

What is CMB's battery management system design?

CMB's battery management system design includes cell voltage tracking, cell balancing, and health status readings for battery packs by App and computer.

We offer both Custom BMS Solutions and Ready-to-Deploy Platforms to meet diverse customer needs. With real-time diagnostics, precise voltage and temperature regulation, and advanced fault ...

Learn how defining clear requirements early can shape performance, safety, and long-term reliability. Selecting the right Battery Management System (BMS) is one of the most important ...

Learn to design custom Li-ion battery management systems with expert guidance on circuit design, component selection, safety features & ...

Build compliant battery management systems for utility-scale, aerospace, and industrial applications. ASIL D architectures, UL certification ready.

At Promwad, we design custom BMS hardware and embedded software for Li-ion, LiFePO4, and other chemistries, optimised for your application's performance, capacity, cost, and safety requirements.

Learn how defining clear requirements early can shape performance, safety, and long-term reliability.

Selecting the right Battery Management System ...

At Promwad, we design custom BMS hardware and embedded software for Li-ion, LiFePO4, and other chemistries, optimised for your application"s performance, ...

We specialize in the development of custom Battery Management Systems (BMS) tailored to the unique requirements of your energy storage needs from stationary (BESS) to mobility (drones, EVs, and ...
