What is a Bess battery system?

These battery systems provide reliable power with minimal setup, offering flexibility for changing site requirements. Containerised Battery Units: Built into secure, weather-resistant containers, these BESS systems are engineered for high-capacity, industrial-scale power storage.

Why do you need a Bess battery?

Minimise your dependence on the grid while gaining energy security for your company or operation. We've made sure this battery is fully compliant to CEC and AS/NZS standards. Configure this BESS system to minimise peak demands can mean big savings on your energy bills.

Why should you choose a Bess energy storage system?

Designed for various applications, from off-grid power to backup solutions, our BESS helps optimise energy use, reduce costs, and improve system reliability. With scalable and flexible options, our energy storage systems offer seamless integration, ensuring a continuous, stable power supply.

How much energy will a large-scale battery energy storage system provide?

The large-scale battery energy storage system (BESS) will provide at least 250 megawatts (MW) of power. This is enough energy to power one-third of Canberra for two hours during peak demand periods. This stored energy will be used to support our electricity grid.

Our BESS systems can be mixed and matched to suit specific project requirements, allowing for ultimate flexibility. Whether you need a small or large-scale system, we've got you covered.
