This project aims to implement a battery energy storage system (BESS) for EPBIH, aimed at enhancing the decarbonisation of the energy sector in Bosnia and Herzegovina.

The country is preparing to install its first battery energy storage system - with a capacity of up to 120 MWh. This is a huge step towards energy ...

It aims to contribute to the energy security and energy efficiency of the region by supporting the development of joint regional storage and distribution solutions and strategies for increasing energy ...

Bosnia and Herzegovina is set to have its first battery energy storage systems installed in the transmission network, which will provide auxiliary services.

Bosnia and Herzegovina is set to have its first battery energy storage systems installed in the transmission network, which will provide ...

Bosnia and Herzegovina is investing EUR700 million to upgrade its power grid and will need 225MW of energy storage to support the integration of 2.5GW of wind and solar power by 2030.

On September 8, 2024, the GSL ENERGY 60kwh wall-mounted battery home energy storage system was successfully deployed in Guatemala, bringing new changes to the local household energy ...

Energy production in Bosnia and Herzegovina is carried out using primary energy from solid fuels, wood biomass, hydropower, as well as other forms of RES (solar and wind energy).
