What happened to energy storage in 2025?

In 2025, US energy storage sector experienced a turbulent ride as the Trump administration took significant action to roll back and eliminate key clean energy investment incentives and funding for renewables provided by the Biden-era Inflation Reduction Act (IRA).

How many MWh will energy storage be achieved by 2025?

The Act established a 1,000 MWh energy storage target to be achieved by December 31, 2025. The Act requires each electric distribution company annually report energy storage installations in their territory no later than February 15. Progress

How much money did energy storage & smart grid attract in 2025?

According to Mercom Capital Group's report on global Energy Storage and Smart Grid funding and M&A activity, the sector attracted \$16.2 billion across 119 deals in 2025, compared with \$19.9 billion raised through 116 deals in 2024.

How has China impacted the energy storage industry in 2025?

In 2025, China made a couple of major political moves affecting its energy storage sector. In late November, the Ministry of Industry and Information Technology (MIIT) pledged to accelerate the rollout of targeted policies aimed at curbing "irrational competition" in the power and battery energy storage industry.

Massachusetts is making a big push for batteries -- not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid. State officials...

While power demand is expected to continue to see strong growth in 2025 and beyond, the growth rate of low-carbon energy sources is now close to covering the entire demand increase. ...

The US energy storage market set a record for quarterly growth in Q2 2025, with 5.6 gigawatts (GW) of installations, according to the latest US Energy Storage Monitor report released ...

Section 20. of the Act established a 1,000 MWh energy storage target to be achieved by December 31, 2025. The Act requires each electric distribution company annually report energy storage ...

Wood Mackenzie projects Q4 2025 will set a record for the residential sector as customers accelerate installations ahead of the Section 25D tax credit expiration. The Community, ...

In 2025, US energy storage sector experienced a turbulent ride as the Trump administration took significant action to roll back and eliminate key ...

Battery energy storage systems (BESS) are rapidly reshaping the energy landscape across the United States. As these systems become a critical component of decarbonization ...

With a clear goal of 5,000 MW by 2030 and a solid procurement plan, Massachusetts stands out as a prime market for energy storage ...
