One of the most important regulatory issues in Brazil's 2025 Agenda is the restriction of solar and wind plant energy due to the lack of capacity of the transmission ...

The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar.

The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such ...

The methodology will still be disclosed, but it is expected to be a combination between the lowest fixed price offered and the Remaining Capacity of the SIN for Generation Flow at the project's busbar.

This initiative forms part of ANEEL's 2025-2026 Regulatory Agenda, which seeks to modernize Brazil's energy framework by incorporating energy storage systems (SAE), including ...

Grid connection queues in Brazil are offering new opportunities for energy storage and hybrid systems and opening new energy business models. Renewable energy companies are adding ...

One of the most important regulatory issues in Brazil's 2025 Agenda is the restriction of solar and wind plant energy due to the lack of capacity of the transmission systems and the supply of ...

Enter the energy storage cabinet --the unsung hero bridging Brazil's solar potential and grid reality. These modular systems have evolved far beyond simple battery boxes.
