Construction company China Overseas is set to begin construction of a hydroelectric dam at the Sounda site in Q1 2025. With a capacity to generate 600-800 MW of electricity, the project aims to ...

Romanian transmission system operator Transelectrica has announced a tender for a battery energy storage project with a 35MW power output and 70 MWh storage capacity. [pdf]

This report provides an initial insight into various energy storage technologies, continuing with an in-depth techno-economic analysis of the most suitable technologies for Finnish conditions, namely ...

As Congo's capital grapples with power outages affecting 43% of households weekly, the Brazzaville Energy Storage Station emerges as a game-changer. Operational since Q2 2023, this 560MWh ...

Hence, to support the high-quality power supply, this research explores the complementary characteristics of the clean energy base building different types of pumped storage power stations, ...

Combining 180 MW wind turbines, 120 MW solar panels, and 80 MWh battery storage, this \$420 million project aims to power 300,000 households while reducing CO2 emissions by 240,000 tons annually.

That's exactly what Brazzaville's cutting-edge energy storage initiative aims to achieve. Nestled along the mighty Congo River, this \$330 million project isn't just local news - it's rewriting the ...

Summary: This article explores the growing role of energy storage systems in Brazzaville's power grid, highlighting major companies, innovative projects, and industry trends. Discover how energy storage ...
