Are Belgium's EV charging infrastructure incentives sustainable?

Belgium's EV charging infrastructure incentives, coupled with Flanders' Ecology Premium Plus program, demonstrate the nation's unwavering commitment to sustainability and environmental responsibility.

What is the electrify Brussels deployment plan?

The electrify.brussels deployment plan calls for every household in Brussels to have at least one public charging station within 150m of their home, and for new stations to continue to be installed where they are most used in Brussels. Is the region's electricity network powerful enough to cope with the development of electric vehicles?

What is electrify Brussels?

Electrify.brussels is the name of the plan to install a network of electric vehicle charging points in Brussels that will be available for everyone to use. To find out more, download the electrify.brussels roll-out plan. Why deploy public charging points? The majority of households in Brussels do not have private parking.

Does Brussels offer a tax saving on office parking spaces?

In the vibrant heart of Belgium, Brussels offers a unique incentive for companies: a tax saving of up to EUR75 on office parking spaces when equipped with charging units. This tailor-made initiative underscores Brussels' dedication to fostering electric mobility within its corporate landscape.

Up to 75% of home and business EV charging installation costs can be deducted from personal income tax. In Brussels, micro and small enterprises replacing diesel vans due to the Low Emission Zone ...

EPBD III, transposed into Belgian law, sets ambitious requirements for near-zero energy (BEN) buildings and emphasizes the importance of charging infrastructure for electric vehicles.
