What should I do after installing solar panels?

However, you still need to do some things after solar panel installation to make the most of your investment. These include: After installing solar panels, you must register your system with the Australian Small-scale Renewable Energy Scheme (SRES) administrator, the Clean Energy Regulator (CER).

Do solar panels need maintenance?

Solar panels are generally low-maintenance but may accumulate dust, dirt, bird droppings, leaves, or other debris over time, reducing their output and performance. Therefore, you should inspect your panels regularly and clean them when necessary.

How often should I review my electricity bill after installing solar panels?

After solar panel installation, you should review your electricity bill and feed-in tariff regularly to understand your energy consumption and generation patterns and ensure you get the best deal for your solar power. Your electricity bill may look different after you install solar panels, as it may include the following charges and credits:

Should you upgrade your solar panels or inverters?

Embrace the energy efficiency revolution by upgrading your solar panels, battery or solar inverters with Energy Matters. A solar inspection after installation is crucial to ensure everything is in shape. Within 12 months of switching on, the Clean Energy Regulator (CER) might invite you to participate in their free inspection program.
