We can help you: Europe - StarTech.com Server Racks offer durable construction that ensures a stable platform for valuable network and server equipment.

Can I rent a rack in a data center?

Physical protection of racks. In the data center you can rent both: open and individually locked racks. You can get to the server hardware only if the lessee (owner of the hardware) issues a temporary code for short-term access.

How many connection channels can be provided per rack?

Usually, a maximum of 4 connection channels per rack can be provided. The power allocated to the rack is typically 5-15 kW. The more power, the more effort required to dissipate heat and the chance of the rack overheating.

A 27U high, 600mm wide and 1000mm deep free air conditioned IP54 server rack with a 230V single phase 1.5kW air conditioner built-in from Server Room Environments.

Choose from single or dual-socket systems, various chassis depths, and hot-swappable drive bays. Optional GPU acceleration and custom I/O expansion are also available.

They rent a space not only for a dedicated server, but also for one or several units in a server rack, an entire rack or several server cabinets in a closed box.
