China and European solar and storage leaders met in Düsseldorf, Germany, this week to call for deeper cross-border cooperation as both regions confront record PV additions, rising storage ...

Let's face it - Europe's energy transition is hitting speed bumps. The continent needs 112 GWh of new battery storage by 2030 to meet its renewable targets [10], but local manufacturers can't keep up.

As Chinese companies become involved in battery parks and energy storage projects across Europe, these partnerships help them better align with European regulations and grid ...

Both regions have rolled up their sleeves to tackle grid instability and renewable intermittency through bold policy frameworks. But here's the kicker: China-Europe energy storage ...

As panel prices drop and the EU targets 780 GWh of battery storage capacity by 2030, the question is whether Europe can mount an effective industrial response to China's state-directed ...

As panel prices drop and the EU targets 780 GWh of battery storage capacity by 2030, the question is whether Europe can mount an effective ...

Sungrow is introducing its large-scale energy storage system, PowerTitan 3.0, to Europe, featuring grid-forming capability, next-generation battery cells, DC coupling for co-located solar ...

China's massive 30-megawatt (MW) flywheel energy storage plant, the Dinglun power station, is now connected to the grid, making it the largest operational flywheel energy storage facility ever built.
