What is an IP55 outdoor cabinet?

The second "5" indicates that the body can withstand the effects of water jets coming from any direction. This means that an IP55 outdoor cabinet can operate safely during rain, splashes, or routine external washing, making it suitable for most outdoor telecom and electrical installations.

What is an IP55 rating?

One of the most widely used protection levels is IP55. In this article, we explain what an IP55 rating is, how protection against dust and water is achieved, and which design features allow an IP55 enclosure to withstand outdoor and industrial environments.

Are IP55 cabinets better than IP56 cabinets?

IP55 cabinets are more cost-effective and suitable for standard applications. IP56 cabinets are more expensive but necessary for harsher environments. IP56 cabinets offer better long-term protection, reducing maintenance and replacement costs in challenging environments. Summary

What is IP55 used for?

IP55 is suitable for environments where the equipment is exposed to light water jets or splashes but not submerged or exposed to high-pressure water. Common applications include: Outdoor electrical enclosures (e.g., junction boxes, control panels). Industrial equipment in areas with occasional water splashes. Street lighting fixtures.
