Why are IP55 enclosures more expensive than IP65 enclosures?

Higher protection levels often mean higher prices. IP55 enclosures cost less because they offer basic protection. IP65 enclosures cost more due to better dust and water resistance. IP66 enclosures have the highest price because they provide the strongest protection. IP55: Budget-friendly for simple outdoor setups.

What is the difference between IP55 & IP66 enclosures?

IP55 enclosures protect against dust that could interfere with normal operation and can handle water jets from any angle. IP65 enclosures are fully dust-tight and shield your equipment from low-pressure water jets. IP66 enclosures offer the highest protection, keeping out all dust and withstanding powerful water jets.

What is an IP55 rating?

One of the most widely used protection levels is IP55. In this article, we explain what an IP55 rating is, how protection against dust and water is achieved, and which design features allow an IP55 enclosure to withstand outdoor and industrial environments.

Why should you choose an outdoor electrical enclosure with an IP55 rating?

When you choose an outdoor electrical enclosure with an ip55 rating, you get a solid balance between protection against dust and water. The ip55 rating means your equipment receives almost complete protection from dirt, dust, oil, and other non-corrosive materials. You also gain complete protection from contact with the enclosed equipment.

With an IP55-rated enclosure, built-in UPS modules, breaker protection, and dedicated battery space, Citadel ensures continuous operation for telecom, traffic, and CCTV systems under extreme conditions.

The SolaX ESS-AELIO is a high-performance C& I energy storage system featuring AFCI protection and IP55 rating. 50kW, 60kW are available, 100/200kWh. Contact us today!

We carry IP55 enclosures that demonstrate almost complete protection from particles and a good level of protection against water. All of our enclosures ...

Featuring an IP55/IP65-rated enclosure, it offers excellent resistance to water, dust, and corrosion, making it ideal for solar energy, wind-solar hybrid, off-grid, and industrial backup ...
