High performance and reliability come in a compact package, for a wide range of temperature/humidity testing needs. Continuous improvement in the design of constant-temperature (and humidity) ...

Temperature and humidity control system: 7-inch touch screen, the system has the functions of temperature control, humidity control, timing and over-temperature ...

The humidity inside the cabinet exceeds the limit, the constant humidity module is activated, and the humidifying pad is activated, with a lifespan of more than 5 years

The 120 kW automatic switching cabinet integrates STS-based control, protection, and monitoring functions to enable safe and automatic grid-connected and off-grid operation works with energy ...

The SIMN XHH Series represents the pinnacle of precision environmental control technology, combining advanced temperature regulation with intelligent humidity management in a compact cabinet design.

Suitable for both on-grid and off-grid scenarios, our cabinets convert fluctuating energy prices into predictable costs, ensuring uninterrupted power supply for production lines even during grid outages, ...

This electric storage cabinet keeps temperature steady between 54-72°F and maintains ideal humidity levels for long-term preservation. Without proper storage, fluctuations in temperature ...

The programmable constant temperature and humidity test chamber can simulate various temperature and humidity environments.
