Iceland opens world's largest carbon sequestration plant, using direct air capture and geothermal energy technologies to mitigate climate change.

In this post, I want to explore how Iceland Carbon Capture and Storage actually works, why Iceland is the perfect place for it, and what lessons the rest of the world can take from this ...

Iceland's battery energy storage project bidding offers a unique mix of challenges and opportunities. With its harsh climate and ambitious green targets, the country is becoming a testing ground for next ...

Imagine a world where volcanic landscapes power cities without fossil fuels. That's exactly what the Reykjavik lithium battery energy storage power station aims to achieve. As one of Europe's most ...

This article explores bidding strategies for energy storage projects, market trends, and how global bidders can leverage Iceland's renewable energy leadership. Discover key data, case studies, and ...

In this post, I want to explore how Iceland Carbon Capture and Storage actually works, why Iceland is the perfect place for it, and what lessons ...

For reducing the operation cost of shared energy storage stations and ensure the operation stability of power grid, this paper proposes an operation strategy of shared energy storage ...

On Thursday, 16 June 2025, Mr. J&#243;hann P&#225;l J&#243;hannsson, Minister of Environment, Energy and Climate, formally opened the Silverstone facility by Carbfix at Hellishei&#240;i Geothermal Powerplant. The ...
