What was your part cooling fan set at because 210c is very much so not too hot for pla at the speeds a bambu prints at. Also, another point. Slowing the print can help a lot as the part cooling ...

This article provides a systematic overview of battery cooling plates, including their types, principles, manufacturing processes, and development trends, highlighting their key role in ...

Our high-performance cold plates are designed specifically for battery cooling, ensuring stable temperatures and optimal performance. By effectively dissipating heat, these cold plates extend ...

ToneCooling designs and manufactures custom battery cold plates for EV battery packs, commercial vehicles, stationary storage and backup power systems. We support prismatic, pouch ...

New energy cooling plates play a critical role in maintaining the performance and safety of modern energy systems. With custom designs, high reliability, and lightweight construction, they are an ideal ...

Introducing the Direct Cold Plate, an efficient heat exchange system utilizing refrigerant to rapidly dissipate heat from battery applications to the air ...

No extra cooling for the RAM/SSD? I also have the K4 and have resorted to putting it upside down with a 12 cm blowing straight on the RAM+SSD and the bottom removed (now the top) ...

Thermoelectric cooler assemblies designed for harsh and remote environment applications, including electronic cabinets and battery cabinets in mobile base stations and cell towers, combine superior ...
