What is the 2025 Europe PV system pricing report?

The 2025 Europe PV system pricing report covers solar capex for 15 major countries across residential, commercial and utility-scale segments. It includes detailed breakdowns for national average system costs for France, Germany, Italy, Spain and the UK across the three segments.

How much solar PV is needed in Italy?

Solar PV should represent 68% of that renewable capacity. It will be critical that the vast majority of the deployed capacity is comprised by utility-scale plants to minimise costs, whilst ensuring security for the energy system. This new capacity will bring the overall renewable installed power in Italy to 143 GW.

Which country has the highest installed solar PV capacity in Europe?

With roughly 79 GW of solar PV in operation at the end of October 2023, Germany's installed capacity remains the highest in Europe. Germany seeks to fulfil the commitment of its government coalition formed at the end of 2021 to reach 22 GW of yearly installed solar PV by 2026 targeting a total installed PV capacity of 215 GW for 2030.

Are European citizens and businesses choosing low-cost solar to control their energy bills?

The report shows major growth in the solar rooftop segment, indicating that Europe's citizens and businesses have opted for low-cost solar to control their energy bills. Clean, affordable and secure energy for Europe's citizens and businesses is at the core of the European Commission's energy policy.

Serving residential, commercial, industrial, and government clients across European markets with advanced photovoltaic and energy storage solutions.

For a typical 100 MW/400 MWh utility-scale installation in Europe, hardware and equipment costs currently range from EUR40 to EUR60 million. However, these costs are expected ...

The 2025 Europe PV system pricing report covers solar capex for 15 major countries across residential, commercial and utility-scale segments. It includes detailed ...

Comparison with Current Cost Structures In 2024, the average CAPEX for utility-scale solar PV in Europe decreased by 28% due to record-low module prices This significant reduction is attributed to ...

Meet the photovoltaic energy storage cabinet - the unsung hero making solar power work through Netflix
