Why is container transport important in Australia?

This standardisation makes container transport one of the most cost-effective ways to move goods across Australia's vast distances. Melbourne's port handles over 37% of Australia's container trade, making it the busiest container port in the Southern Hemisphere.

How much does container transport cost?

Containers are stored in designated yards within the port facility. Most ports offer 5-7 days of free storage before demurrage charges apply - typically \$50-\$100 per day. This is where professional container transport services become invaluable.

How long does a 50kw Solar System last in Australia?

Most 50kW solar systems in Australia have an average payback period of 4 years. However, depending on your location and energy consumption patterns, the system may pay back in as short as 3 years, or extend to around 5 years. The more energy you consume from your 50kW solar system, the faster it will pay itself back.
