Are photovoltaic panels subsidised in Luxembourg?

The installation of photovoltaic panels is heavily subsidised by the Luxembourg government and local authorities. This practice is fully in line with the national objective of reducing greenhouse gas emissions (-55% by 2030). Consult our Guide to photovoltaic subsidies in Luxembourg (subsidies 2025).

How to install solar panels in Luxembourg?

Consult our Guide to photovoltaic subsidies in Luxembourg (subsidies 2025). The best way to install solar panels in Luxembourg is to analyse three key factors: Roof pitch : The ideal angle for solar panels in the region is between 25 and 35 degrees to the horizontal, optimising exposure to the sun's rays all year round.

Are photovoltaic panels and self-consumption compatible with all electricity suppliers in Luxembourg?

Photovoltaic panels and self-consumption are compatible with all electricity suppliers in Luxembourg. However, some are more suitable than others because they can : Invest part of your subscription in the development of power stations in Luxembourg and in the Grande Région (wind farms, solar panel farms, etc.).

How can Luxembourg save money on solar panels?

Luxembourg homeowners can reduce their electricity bills and sell surplus production thanks to the self-consumption model. The government is proposing subsidies covering up to 80% of installation costs with an estimated return on investment of between 5 and 7 years. How steep should the roof be for solar panels?

Thermal solar panels are generally less expensive than photovoltaic ones, costing around 400 to 600 euros per square metre installed, and have high energy yields for heat production alone.

While photovoltaic panel costs in Luxembourg City remain higher than EU averages (EUR2.10/W vs EUR1.85/W), generous subsidies and efficient energy pricing create compelling ROI.

There is no extra cost and you are covered for replacement value without any specific limitation in case of fire, and up to EUR 50,000 in case of hail, storm or electrical damage.

This article guides you through the main steps to complete your project, from financial assistance to the importance of taking out suitable photovoltaic panel insurance.

Thermal solar panels are generally less expensive than photovoltaic ones, costing around 400 to 600 euros per
