The Apollon PV Park has commissioned a 3.3 MWh battery energy storage system (BESS) and solar project, in a milestone for Cyprus.

Enter Nicosia's energy storage power station - the island's superhero in disguise (cape optional). As Cyprus races to meet its 2030 target of 22.9% renewable energy [2], this storage facility ...

TotalEnergies is betting big on the solar power market in Cyprus. It won the environmental approval for a photovoltaic park of 100 MW in peak ...

Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions on Tuesday, ...

TotalEnergies is betting big on the solar power market in Cyprus. It won the environmental approval for a photovoltaic park of 100 MW in peak capacity, with energy storage. It ...

Cyprus is poised to introduce large-scale renewable energy storage solutions by 2026, a move aimed at addressing the nation's increasing demand ...

This article explores the groundbreaking energy storage power station project, its technical challenges, and how it aligns with global trends in grid stability and renewable integration.

You know how Cyprus hit 42% renewable penetration last month? Well, that's sort of a double-edged sword. The Nicosia Pumped Storage Power Station project, currently in advanced planning stages, ...
