What will the Czech electricity storage scheme do in 2025?

In an announcement released on March 7, 2025, the executive arm of the European Union said that the Czech scheme will support the installation of at least 1.5 GWh of new electricity storage facilities. The measure will be open to all storage technologies directly connected to the transmission network or distribution network.

Why are Czech businesses investing in renewable projects without subsidies?

The subsidy increases to cover up to 75% of costs for community projects. But what we noticed at Wattstor is that Czech businesses are investing in renewable projects even in the absence of subsidies, because they have realised the strong business case for generating clean energy on site.

How does the Czech government cope with higher energy bills?

Unlike other European countries, the Czech Government has traditionally relied on the market to self-regulate, avoiding state intervention. This means that as prices rose, consumers and businesses had to cope with higher energy bills.

Other large Czech energy companies are interested in SMRs, particularly at sites traditionally used for coal-fired power production. Licensing will be a key factor in the timing for these ...

Aid will be granted through a competitive bidding process, open to all storage technologies connected to the transmission or distribution grid. Funding will cover up to 50% of ...

The European Commission (EC) has authorized a EUR279 million (\$303 million) Czech state aid scheme to support investment into electricity storage facilities and foster the transition towards...

How can Czech organisations make the most of their renewable generation assets? Here's a review of energy storage in the Czech market.

The contracts are uploaded from all public and private sources covering over half a million buyers. Sign up to get instant access to unlimited Czech Republic Renewable Energy ...
