The Dakar Energy Storage Power Station has emerged as a flagship project in West Africa's renewable energy landscape. Designed to stabilize Senegal's power grid and support ...

At an anticipated size of 40 MW, which will provide 175 MWh of energy, the battery energy storage system (BESS) will be one of the largest of its kind in the West African region.

In this article, we'll explore how smart energy storage solutions are transforming West Africa's renewable energy landscape, backed by real-world examples and actionable insights.

The on-time commissioning of Walo Storage demonstrates our ability to support Senegal's energy transition using cutting-edge technology. It is also a key milestone in our ambition to build ...

Construction of the battery energy storage system is expected to commence in early 2024 at the Tob&#232;ne substation in Thies and is expected to become operational in 2025. ...

The project aims to enhance grid reliability, expand clean energy access and support Senegal's sustainable energy transition. Construction on the project began in May ...

our energy delivery, Walo Storage marks a major technological breakthrough for the country. The installation facilitates the increasing integration of solar energy while avoiding the emission

We specialize in electric power containers, photovoltaic containers, mobile power stations, outdoor site energy systems, backup power, clean energy, photovoltaic projects, solar ...
