DESIGN & AIRFLOW - The open frame design of this 42U data rack promotes unobstructed airflow, vital for maintaining the performance of server and network hardware.

Each of these racks come standard with 2 vertical cable management bars. The width of the cable management bars create enough room to mount 2 APC style PDUs side by side. The design allows ...

You can mount the Sun Fire V480 server and the Sun Fire V440 server in either a 4-post rack or a 2-post rack, using optional two-post rackmounting kits. The racks used for mounting the other servers ...

Preset depths and adjustable depth versions help you accommodate various server sizes and make the best use of floor space. The included casters ease rear cable access and enables you to ...

You want optimal performance, easy deployment and scalability for your IT systems and data centers. Our data center racks, cabinets and enclosure solutions provide support and protection to your ...

Our cabinets are the EIA standard 19" server rack. The sizes are available in 24U, 42u and 48U to get the most height out of your data center space. All of these ...

We publish witnessed test data (deflection, tip, and caster tests). For heavy builds (battery cabinets, dense storage), we add reinforced bases, heavier rails, spreader bars, and through-bolt anchoring.

Preset depths and adjustable depth versions help you accommodate various server sizes and make the best use of floor space. The included casters ease rear ...
