What is a network rack & cabinet?

Network Racks and Cabinets are essential for any network. Cabinets are used for storing routers, patch panels, switches and a wide variety of networking equipment and accessories. Network cabinets support large, modular network switches by providing additional space for cable management and side-to-side airflow solutions.

Are network cabinets compatible with server cabinets?

Our network cabinets seamlessly interface with server cabinets, creating a cohesive infrastructure that simplifies power distribution and monitoring. Compatibility with standard 19-inch rack units ensures that server rack cabinets and network racks can be installed side-by-side.

Why should you choose nVent network racks & cabinets?

nVent network racks & cabinets: the essential foundation for your IT infrastructure, optimizing cabling, security, thermal management and physical protection. Offering scalability and future compatibility, our portfolio features standard solutions as well as dedicated products for demanding applications.

What is a network cabinet?

Networking cabinets tend to have a wider footprint with additional interior space along both sides for cable management. Inside of network cabinets allows easy access to cables and equipment and may have removable doors and/or side panels. Cables can be organized with cable management accessories in the front or back of the cabinets.
