How much power does a Nord control cabinet inverter have?

NORD control cabinet inverters have a power range of up to 215 HP and thanks to their wide range of functionality can be perfectly adapted to many customer applications. NORD Frequency Inverters already meet the requirements of energy efficiency classification IE2 of the new Ecodesign directive (EU) 2019/1781 (valid from 1st of July 2021).

Which frequency inverters are suitable for control cabinets?

No matter where you are in the world, our drives are your solution. We have developed the NORDAC PRO family of frequency inverters specifically for installation in control cabinets. These inverters are equally suitable for operating synchronous and asynchronous motors and meet all customer requirements thanks to a wide range of custom options.

Are Nord frequency inverters energy efficient?

NORD Frequency Inverters already meet the requirements of energy efficiency classification IE2 of the new Ecodesign directive (EU) 2019/1781 (valid from 1st of July 2021). NORD inverters are the solution for drive tasks in numerous applications installed all over the world.

Why should you choose a nordac pro inverter for control cabinet installation?

High performance with safety: NORD inverters with STO and SS1 We have equipped our NORDAC PRO inverters for control cabinet installation with extensive safety functions. The Safe Torque Off (STO) function switches off the motor torque, e.g. to prevent accidental starting or to initiate an emergency stop.

The i950 servo inverter is based on the standards of IEC 61131-3, PLCopen, and CiA 402, and can be employed for a comprehensive range of machine tasks. This future-proof platform architecture ...

Streamline your supply chain to ensure timely and cost-effective delivery of inverters. Establish strong relationships with suppliers, and implement effective ...

We have developed the NORDAC PRO family of frequency inverters specifically for installation in control cabinets. These inverters are equally suitable for operating synchronous and asynchronous motors ...

The inverter shuts down automatically in case of a battery voltage down to 10 V resp. 20 V. If the device overheats, the inverter shuts down - the "OVER TEMP" LED (fig. 1.4, page 1 / fig. 10.5, ...
