The technology enables charging the batteries of electric vehicles and transferring the stored energy back to the stationary storage system in the building or to the grid when needed.

The ESS-GRID Cabinet series are outdoor battery cabinets for small-scale commercial and industrial energy storage, with four different capacity options based on different cell ...

The SCALE project has published technical guidelines to help standardise smart and bidirectional charging infrastructure across Europe. The recommendations support EU climate goals ...

Designed for harsh environments and seamless integration, this IP54-rated solution features a 105KW bi-directional PCS, optional air- or liquid-cooled thermal ...

The ESS-GRID Cabinet series are outdoor battery cabinets for small-scale commercial and industrial energy storage, with four different capacity options based on different cell compositions, 200kWh, ...

What is an Outdoor Photovoltaic Energy Cabinet for base stations? An Outdoor Photovoltaic Energy Cabinet is a fully integrated, weatherproof power solution combining solar generation, ...

These technical requirements summarize a minimal and uniform set of recommendations for purchasing and operating smart and bidirectional charging infrastructure.

Is bidirectional charging permitted in Europe? Find out here what challenges still exist and when bidirectional charging is coming.
